

Join our AI Marketplace Pilot

It's hard to navigate the rapidly evolving world of AI solutions and suppliers. Sourcewell Ventures invites you to join a no-cost Artificial Intelligence (AI) Marketplace pilot, designed to help public agencies more easily explore and evaluate the latest AI solutions.

Why participate?

As a pilot participant, your agency will have the opportunity to:

- Explore emerging AI tools and use cases with minimal effort or commitment
- Explore AI solutions in a learning-focused environment without sales pressure
- Validate whether a marketplace model could benefit governments more broadly
- Influence how Sourcewell supports agencies adopting AI

Participants will receive access to a digital marketplace experience that allows you to:

- Browse curated AI use cases, solutions and supplier offerings
- Access learning content, videos, and real world examples
- Request quotes or initiate purchases where applicable

There is no expectation to purchase, adopt, or integrate any solution.

What we ask of participants

Time commitment is minimal and participation can happen at your convenience:

- 30-60 minute onboarding session
- Explore the AI Marketplace as much as you'd like, on your own time
- Participation in two short surveys over a few months
- Participation in a one-hour discussion, at your convenience

Engage in this free
multi-month pilot at
your own pace.
